

Find Account By Email

PUT /accounts/findbyemail

Returns a list of logins that the user's email address and password are associated with. This can be multiple logins within the same site or within multiple sites if the user has logins in multiple locations.

Example

https://secure.accesssacs.com/api_accesssacs_mobile/v2/accounts/findbyemail

Required Permissions

The user must fall into one of the categories below:

- System Administration
- A staff member with manage user rights

Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

username: "jadams"

password: "password231"

Request Body Data

```
