

ACS Facility Scheduler REST API

The following REST APIs are the most recent API offering for ACS Facility Scheduler from ACS Technologies.

These REST APIs return a JSON (JavaScript Open Notation) result, and the data returned is based on the user's credentials used within the calls. API calls only return data the user has rights to view.

No additional cost is associated with these APIs, but you must have [ACS Facility Scheduler](#) to use them.

New to APIs?

To learn more about REST APIs, see [RESTful Web Services: The Basics](#) and [Representational State Transfer](#).
