PDS Church Office 9.0D, released for OnDemand 4-30-19 and for desktop 5-7-19, offers the following enhancements.

Quick Links

- [New Features](#)
- [Improved Features](#)
- [Corrections](#)

New Features

New Last Name Fields

✓ We added three last name fields for family reports: **Head Last**, **Mother Last**, and **Father Last**. In the List of Fields to Print, these are located under **Fam > Fam - Detail**.

Improved Features

Split Batches

✓ Now, there's an easy way to split a batch into two batches with different batch numbers. You may need to do this if someone imported transactions into a batch that was supposed to be separate batches. For example, you want to move all of your entries from March to a new batch.

Move Fund Entries From:

Fund: Any Fund
 Specific Fund Identifier: 4 - 15

Date: Any Date
 Specific Date:
 Date Range: 03/01/2019 Thru 03/31/2019

Activity: Any Activity
 Specific Activity:

Batch Number: Any Batch
 Specific Batch:

Move Fund Entries To:

Fund Identifier: Keep Same Fund
 Move to a Different Fund:

Date: Keep Same Date
 Move to a Different Date:

Activity: Keep Same Activity
 Move to a Different Activity:

Batch Number: Keep Same Batch Number
 Assign the Next Batch Number to Entire Batch
 Split Batch - Assign the Next Batch Number to Selected Entries

< Back Next > Cancel

✓ In the Move Fund Entries process, there's a new option to assign the next unused batch number to the selected fund activities. For more, see [Move Fund Entries](#).

Assign Member Contact Information to Family Records

✓ We improved the process that assigns family phones/emails to member records. Now, you can add phones/emails from members to the family record.

Select What You Want to Do:

Assign Family Information to Family Members
 Assign Member Information to Families

Add the Member Information to Families:

Phone Numbers
 Email Addresses

One Phone Number Only, or All Phone Numbers:

Add Only the First Member Phone Number
 Add All Member Phone Numbers

Add Phone Numbers from Which Member Types:

All Members in the Family

- Head
- Spouse
- Adult
- Young Adult
- Child
- Other

✓ For steps, see [Assign Family or Member Phones or Emails](#).

Greek Orthodox Member Voting Reports

✓ We added more options to the following reports: Voting Member List with Criteria, Voting Criteria Check List, and Voting Member Sign-in List.

✓ These options help determine which members are eligible for voting. Each one is optional, so you can decide the criteria you want to use.

Voting Eligibility Requirements

Consider Member Types

Eligible Member Types:

Include	Member Types	
<input checked="" type="checkbox"/>	Head	▲
<input type="checkbox"/>	Spouse	
<input checked="" type="checkbox"/>	Adult	▼
<input type="checkbox"/>	Young Adult	

Select All

Clear All

Corrections

We fixed the following issues that affected some of our clients.

- Pressing **Q** to search for a family was recorded as an ID change in the user log.
- After marking the last member of a family deceased, the Family Inactive date was not updating.
- If you had the same phone number with different types (such as Personal and Text), one was being removed as a duplicate. Now, the program checks to see if the phone numbers and types match before removing duplicates.
- When setting up sacrament place names and addresses, if you used Quick Lookup and the place was not in your data, you were prompted to add it. Since this is not how you add new places, a message now displays saying the place was not found.
- In certain situations, information entered in the Memorial process was not saved.
- When using OnDemand or remote access, the default local printer was not being automatically selected.
- When posting eGiving using a .csv file, an error sometimes incorrectly displayed saying the file was not found or had an incorrect format.
- Users were unable to change their password even when they had access to the Users & Passwords window.
- In the online registration process, if you sent an email when there was no Head of Household, the form listed duplicate members after importing the file into PDS.
