

Forms

Overview

A form lets you collect information from your website users. Your questions appear as text on the web page. Empty fields let your users enter their answers. The answers are sent to you via email. From within Extend, you can also export them to a separate file for viewing or printing.

Good uses for web forms include:

- prayer requests
- sign-up sheets
- requests for additional information
- any topic which can benefit from user input

Below is a sample form created in Extend.

First Name * Last Name *

Email Address * (For example: name@company.com)

How do you hear about us?

Friend

Radio

Newspaper

Yellow Pages

How long have you lived in this area?

How do you want us to contact you? *

When is the best time to contact you? *

Morning

Afternoon

Evening

Anytime

What type of information are you looking for?
