

Get Event Details by Event ID

Attention

For this API to work correctly, the Access ACS calendar must be set as your default calendar.

GET `/:site_number/accessevents/:event_id`

Returns detailed information for a single event by event ID.

Example

`https://secure.accessacs.com/api_accessacs_mobile/v2/12345/accessevents/123`

Required Permissions

The user must fall into one of the categories below:

- System Administration
- A user with Full/View Rights to the Calendar Event

Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

username: "jadams"

password: "password231"

URL Parameters

site_number – The site number to gather data for.

event_id – The ID of the event to be retrieved. Value from [Get List of Events API](#).

Return Data
