       {
   "ConnectionId": -1,

   "Complete": false,

   "ConnectionDate": "06/05/2015",

   "ConnectionTypeId": 1,

   "FamilyConnection": false,

   "ContactIndvId": 76,

   "OpenCategoryId": 1,

   "Reassign": false,

   "NewCallerIndvId": -1,

   "NewTeamId": 1,

   "Comment": "Test",

   "ResponseIdList": [-1]

    }
```

Required Permissions

The user must fall into one of the categories below:

- System Administration
- A user with the following rights:
    - Ability to create a change request
    - Full Rights to at least one Connection Type
    - Ability to locate a person or search for a member
    - Full rights to Add/View Comments

Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

u sername : "jadams"

password : "password231"

URL Parameters

Site_number – Site number to gather data for.

Individual_ID – Individual associated with the record.   Values from   Individual Search API.

JSON Body Text

```
ConnectionId: [-1] **
Complete: [ true | false] Connection completed?
ConnectionDate:  "06/05/2015" format MM/DD/YYYY
ConnectionTypeId:  1  Values from Connection Types API
FamilyConnection: [ true | false]  Family connection vs. Individual connection.
ContactIndvId:  76  Who will be contacted?  Values from Individual Search API
OpenCategoryId:  1  *Not using, default to 1
Reassign:  [ true | false]  True means the connection will be reassigned; False means it will not.
NewCallerIndvId:  -1  Who will be contacting the individual?  Values from Individual Search API.
NewTeamId: 1  ID of team who will be contacting the individual.  Values from Connections Team List. ***
Comment:  "Test"  This is a comment concerning the connection.
ResponseIdList: [-1]  Values from Available Responses API. (You will need to use the ConnectionTypeId from the
Connection Types API in order to run the Available Responses API.) ****
```

** Values for ConnectionID :

  Add New : -1

  Complete/Modify/Reassign : Enter Connection Id. Value from Connection Details API.

*** Either an Individual or Team can be assigned to make the connection. If a team will be making the connection, then the NewCallerIndvid will have a value of -1. If an individual will be making the connection, then the NewTeamId will have a value of -1.

**** Valid Values for ResponseIdList:

 No responses: -1

 Responses Provided: Enter them in the following format: [value 1, value 2, value 3...]

Return Data

```
HTTP 200 OK
The Id returned is the Connection Change Request ID (ConnectionCRId).
```
