

Get List of Locations

Attention

For this API to work correctly, the Access ACS calendar must be set as your default calendar.

GET `/:site_number/accesslocations`

Returns a list of locations for a site.

Example

`https://secure.accessacs.com/api_accessacs_mobile/v2/12345/accesslocations`

Required Permissions

The user must fall into one of the categories below:

- System Administration
- A user with Grant Rights to Calendar Locations

Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

username: "jadams"

password: "password231"

URL Parameters

site_number – The site number to gather data for.

Return Data

```
[
  {
    "Id": 5,
