

# Connection Types

**GET** `/:site_number/types/connections`

Returns a list of Connection Types with the corresponding permissions for each type that the user has.

These Connections Types are used to create change requests.

## Example

```
https://secure.accessacs.com/api_accessacs_mobile/v2/12345/types/connections
```

## Required Permissions

The user must fall into one of the categories below:

- System Administration
- A user with view rights to at least one Connection Type

## Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

**username:** "jadams"

**password:** "password231"

## URL Parameters

**site\_number** – The site number to gather data for.

## Return Data

```
